

HS1 LTD

TECHNICAL SUPPORT FOR THE CUSTOMER INFORMATION SCREENS AT ST PANCRAS INTERNATIONAL STATION

HS1 has a requirement for the following services:

1. Provide an ongoing technical support for system design, construction design, installation, testing (FAT, SAT) & commissioning, Handover and Hand back at all stages of the project.
2. Site supervision including health and safety advice.
3. Project Planning/Phasing (Migration & Deployment)

In order to support HS1, the Consultant will be required to deliver the following services:

- Deliver technical assurance support during the construction design, installation, testing, and handover process including the development and management of a design assurance gate process on behalf of the Employer.
- Provide technical specialist advise to the Employer of any opportunities where value can be achieved throughout delivery of the project
- Deliver site supervision throughout the installation of renewed services and advise the Employer of any safety concerns or improvement areas

Core tasks to be undertaken:

- Manage the Technical Assurance Board throughout delivery.
- Hold risk workshops at key points throughout the delivery of the station c
- Monitor the conformance to design standards e.g., CAD, Asset ID by the contractor and report any non-compliances to the Employer.
- Monitor conformance to Industry Standards by the contractor and report any non-compliances to the Employer.
- Lead on capturing and validating technical requirement throughout the project
